

YAESU FT 920, 1000MP , 1000MP Mark V , 1000MP Mark V Field

This configuration is used for transceivers which include an RS-232 CAT communication interface. The PC controls the RIG via the serial port. Keying can be performed via either serial or parallel port. BAND DATA is acquired from the serial data stream. PTT signal connects to rig via a 1/8" to RCA adapter.
